

December 30 2011

Hope that everyone had a wonderful Christmas. Enjoy the time you have with your families and loved ones. The season is not about gift giving and supporting the economy but about remembering what God has done for us.

Water levels across the district are still mixed. There are some wells gaining and some losing but overall we are 10-20 feet below where water levels should be for this time of year. With the amount of small grains planted and the irrigation already being used on them there is not expected to be much if any gain in aquifer levels. We will need a very wet winter to see much improvement in recharge.

We are currently doing end of year reports. If you have a well we monitor or send in rainfall reports then you should be getting your yearly report in the next month or so. We are always working on upgrading these reports and encourage any comments or suggestions.

We hope that you and yours have a good wet 2012.

Sincerely  
*Finis Allen*
