

March 4 2008

Spring is near and I hope everyone received some rain from this last norther. We had .65 hundredths at the office with it sounding like it got heavier as you go north.

Last week I worked on locating and putting on a map all the pivot and drip systems plus finding any wells not already registered. I found that most systems were watering. I expect our water levels will reflect that when I take readings at the end of the month.

This week I will continue finding wells and locating pivots and drip systems in the 3 countries.

The 20<sup>th</sup> of March at Ballinger high school there will be an Ag Day. We will be there so stop to visit and check out our information. We will be happy to answer any questions and register wells or take requests for water samples.

Sincerely  
*Finis Allen*
